PROFILE

Full-stack developer with 4+ years of experience building and scaling web applications with PHP/Laravel and Vue/Nuxt. Currently on the remote engineering team at Körbler GmbH (Austria), developing 1Tool, a CRM/ERP suite used across Europe. Uses AI-assisted tooling daily in production (Claude Code, Cursor) with full ownership of reviewed output. Comfortable owning features end-to-end — from database design and REST APIs to complex, type-safe UI — in distributed, English-speaking teams.

SKILLS

Frontend	Vue 3, Nuxt 3, TypeScript, Pinia, PrimeVue, Inertia.js, Tailwind CSS, Vite, i18n
Backend	PHP, Laravel, MySQL, Redis, RESTful APIs, Eloquent ORM, OAuth2 / JWT, PHPUnit, TDD
DevOps & Tools	Docker, GitLab CI/CD, Cloudflare Pages, Cursor, Claude Code, AWS, DigitalOcean, Nginx, Git, Sentry, Jira

WORK EXPERIENCE

Full-Stack Developer — Körbler GmbH (1Tool)

Apr 2025 – Present

Wagna, Austria — Remote · CRM/ERP software (1tool.com)

- Develop the front end of 1Tool Suite, a large-scale multi-tenant CRM/ERP platform with 30+ modules, using Nuxt 3, TypeScript, PrimeVue, Pinia and Tailwind CSS.
- Build and maintain the calendar & scheduling module — multi-view calendars, recurring events, integrated with the Laravel REST API backend.
- Work daily with AI-assisted tooling (Claude Code, Cursor) in production — review, validate, and ship output under a zero-warning ESLint policy.
- Collaborate async in English with the Austrian team via GitLab merge requests and code reviews.
- Ship via GitLab CI/CD to Cloudflare Pages; maintain German/English localization with Nuxt i18n.

Full-Stack Developer — Cikatech

Oct 2023 – Sept 2024

Remote · Gaming platform with 90,000+ active members

- Optimized a cron-based task pipeline processing 1,000+ jobs per hour through smarter scheduling and load balancing.
- Cut page load times by ~40% with MySQL query optimization, caching and database partitioning.
- Built high-volume reporting with mPDF and Laravel-Excel, halving report generation time.

Software Developer — SpaGreen Creative

June 2023 – Sept 2023

Dhaka, Bangladesh

- Engineered a Learning Management System sold on CodeCanyon, supporting 10,000+ users.
- Developed a courier management system; improved background-task reliability with cron and Supervisor.

Application Developer — Zit Solution Ltd

May 2022 – June 2023

Dhaka, Bangladesh

- Built secure, scalable RESTful APIs handling 10,000+ daily calls for an electricity bill payment system.
- Improved response times by ~35% with Redis caching, indexing and normalization; modeled 50,000+ records.

Backend Developer — Legend IT Solution

Nov 2021 – May 2022

Rangpur, Bangladesh

- Enhanced Laravel-based ERP systems for cold storage and accounting; gathered requirements directly with clients.

OPEN SOURCE & PROJECTS

Chandra PHP Framework · PHP, MVC, PDO · packagist.org/packages/khokonc/chandra

Lightweight PHP micro-framework (MVC, Singleton and Observer patterns, PDO layer with migrations), published as two Packagist packages.

LeetCode Clone · Laravel, Vue 3, Inertia.js, Tailwind CSS · [GitHub](https://github.com)

Coding-challenge platform with real-time problem solving, submissions and user management.

WeeMeet Messaging App · Laravel, Vue.js, WebSockets, Kafka, Redis · [GitHub](https://github.com)

Real-time messaging platform with audio/video calls, push notifications and Kafka-based message streaming.

EDUCATION

Diploma in Computer Science & Engineering

LANGUAGES

English Professional working proficiency
